TREE PLANTATION

INTERACT CLUB OF

ADARSH PUBLIC SCHOOL

"Plant trees to make our planet green

making our surroundings fresh & clean"

Today, in the modern era, we all are causing a lot of harm to our environment by cutting trees and littering the garbage in our surroundings. In order to take a step ahead, a group of ten Interactors tried to put their best foot forward to save our environment by planting saplings. With around 12 saplings of trees like mulberry, jojoba, ashoka etc. we walked to the park located in the vicinity. Firstly we cleaned the area by picking up the leftovers, wrappers etc. and then replanted and watered those saplings & took the pledge to nurture them. It was

an exhilarating experience which gave an inner satisfaction saying YES… we care for our Mother Earth.
